TEMPERATURE REGULATION GEAR

Welcome to the age of Temperature Regulation

TempReg™ is the industry leader in custom developed "intelligent" performance undergarments. TempReg garments increase stamina, flexibility and comfort attributes that have made many top professional athletes take notice.

What makes TempReg different from other "wicking" garments is its patented **TempReg paneling system**. This technology not only utilizes the body's perspiration more efficiently, maintaining constant, stable temperature, it also reduces the build up of lactic acid in the muscles. This reduction in lactic acid keeps your muscles loose, significantly reducing your risk of strains and pulls.

Count on TempReg to provide you with cutting edge temperature control technology. We are committed to providing athletes with garments that support the highest level of performance - without compromising comfort. As you wear the TempReg line of performance undergarments you will notice what top athletes have known for years: Controlling your body's core temperature is the key to unbeatable performance!

BODY EQUIPMENT

The short sleeve design offers everything you are used to in a T-shirt plus the added temperature regulating benefits of our TR3™ Evaporation Control Technology fabric as well as our "Comfort 5666h Premier" that guarantees comfort at every team.

TR3™ EVAPORATION CONTROL TECHNOLOGY
